4. There have been instances of delay in filing of Goods and Service Tax (GST) returns, Employee State Insurance (ESI) Returns, return of Tax Deducted at Source (TDS) dues and in payment of Provident Fund dues.

There have been instances of delay in filing of GST returns in the past which were due to technological glitches with GST portal, limited time frame for staff to align with the amendments in the initial years and multiple clarifications issued by the GST authorities. A wrong filing of GST return can lead to huge penalties and interest. Therefore, reconciliation and checking of returns before submitting them is necessary as there is no opportunity to make any changes afterward. Hence, there were delays in filing of GST returns in order to include correct inputs from all stakeholders involved and make them error free.

Although, we have undertaken certain steps to avoid future delays by appointing dedicated professionals, which will help us in obtaining timely information from our suppliers and customers, reconciliation of input tax credit and output tax and filing of the required returns before the due date, there can be delays in future due to factors beyond our control. There is a possibility of financial penalties being imposed on us by the relevant Government authorities, which may have a material adverse impact on our cash flows and financial condition.

5. Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw materials and finished goods) and trade receivables. To effectively

manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. During the half year ended September 30, 2024 and for financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, our inventories were Rs. 625.38 lakhs, Rs. 616.62 lakhs, Rs 486.43 lakhs and Rs 490.36 lakhs respectively. Further, if we fail to convert the inventory, we purchase by manufacturing our products, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. We are also focusing on the implementation of robust inventory management and credit control processes. Our inventory practices are designed to optimize stock levels, reduce holding periods, and minimize obsolescence while ensuring timely availability of products to meet customer demand. We regularly review and monitor trade receivables to maintain healthy credit terms and reduce collection cycles. Additionally, we have established stringent credit evaluation procedures and actively follow up on outstanding payments to improve cash flow and liquidity. These measures will enable us to effectively manage working capital and safeguard our profitability and financial stability.

6. *We are dependent on our promoters and senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.*

Our Company's performance is significantly dependent on the expertise, leadership, and strategic vision of our Promoters, Mr. Dillip Das, Mrs. Kiran Das, Mr. Subhasish Das, and other Key Management Personnel. Their extensive experience and established relationships with suppliers, customers, regulators, and other stakeholders are crucial to the smooth functioning, growth, and success of our business. The continued services and contributions of our senior management and key personnel are vital to achieving our business objectives. Any loss of their expertise or inability to retain and manage key personnel effectively could adversely impact our operations, financial performance, and future growth. Efficient human resource management remains critical for our business expansion and long-term success.

We are actively focused on ensuring a supportive and conducive work environment. The continued dedication, skills, and expertise of our team members play a pivotal role in our future performance. Additionally, our commitment to attracting and retaining qualified senior and mid-level managers strengthens our foundation for sustained growth and success in the long term. Further, to strengthen the management capabilities of the Company, the Company has put in place a succession plan to ensure the company's continued success and seamless transition of leadership.

7. *The Proliferation of Look-alike Products in the Market poses a risk on our reputation and brand name*

We face the risk of entities, both in India and elsewhere, attempting to pass off their competitors' products as their own by mimicking brand names and packaging materials, and by creating counterfeit bandages, including false or pirated products. For instance, certain entities may mimic our brand name or packaging materials, or produce look-alike products. Additionally, there is a risk that our trade secrets, including product specifications, could be compromised, potentially enabling counterfeiters to produce products closely resembling ours. Consequently, this could lead to a decrease in our market share as demand for our products is replaced by counterfeit alternatives, adversely impacting our reputation. The proliferation of counterfeit and pirated products, along with the resources expended in defending against such claims, could further impact our goodwill and have detrimental effects on our business, prospects, and financial condition.

To safeguarding and preserve our brand integrity and market position, we actively monitor the market for any infringements on our intellectual property rights, such as unauthorized use of our brand name or logo, and take prompt legal action to address any violations. Along with these, we conduct comprehensive brand awareness campaigns aimed to educate consumers about the importance of purchasing genuine products and how to identify counterfeit items. By implementing these safeguarding measures, we aim to safeguard our brand reputation, retain customer trust, and mitigate the adverse effects of look-alike products in the market.

8. *We derive a substantial amount of our revenue from exports and our exports are exposed to potential financial, economic, political and other risks of international markets.*

We have exported goods worth Rs. 393.37 lakhs, Rs. 846.96 Lakhs, Rs. 727.32 Lakhs and Rs. 765.66 lakhs to neighboring countries for the half year ended September 30, 2024 and financial year ended March 31, 2024, financial year ended March, 2023 and financial year ended March, 2022 respectively. The details of our revenue vis a vis total revenue is provided below:

Duty Drawback benefit received	3.79	8.57	10.86	5.80
DGFT Benefit Received	2.21	6.36	2.53	-

During the year under review, we have experienced loss in business due to political unrest in Bangladesh and we may face such loss in the future due to geopolitical uncertainties in our export markets. Further, our income from export benefits is also subject to change in export policy by the Government of India.

We have taken steps to reduce our reliance on single markets and started exploring new markets and export potentials for our products in the Middle East and South East Asia as well as Europe as part of our efforts to increase our expand our markets and potential customers. We have taken steps to enhance our export credit insurance to offer competitive pricing to our customers and to safeguard against geopolitical uncertainties.

9. *Our cost of production is exposed to fluctuations in the prices of our major raw material.*

Our cost of production is significantly exposed to fluctuations in the prices of major raw materials. This risk is exacerbated by the absence of long-term supply agreements with suppliers and reliance on the domestic market for sourcing raw materials. The financial impact of this exposure is evident in the Cost of Materials Consumed, which has shown a substantial increase over the periods under review: For the Half Year Ended 30th September 2024: Rs. 1,017.36 lakhs, For the Year Ended 31st March 2024: Rs. 2,125.18 lakhs. This represents a significant portion of the total expenses, accounting for approximately 66.2% of total expenses for the half year ended 30th September 2024 and 65.1% for the year ended 31st March 2024. The volatility in raw material prices directly impacts our Profit Before Tax (PBT). However, based on the experience of the promoters and long association in the industry, the Company is well versed to take proactive decisions.

Investing in cost-effective production processes, such as improving manufacturing efficiency and reducing waste, can lower overall production costs. Cost monitoring and analysis provide critical insights for informed decision-making. Forming strategic partnerships and engaging in collaborative research can also drive innovation and create cost-saving opportunities. By employing these strategies, the company can better navigate raw material price volatility, thereby protecting its financial performance and ensuring more stable production costs

10. *Any delay, interruption or reduction in the supply of raw materials to manufacture our products may adversely affect our business, results of operations, cash flows and financial condition.*

Our operations are dependent on the timely, uninterrupted, and adequate supply of raw materials required for manufacturing our products. Any delay, interruption, or reduction in the availability of these raw materials, due to factors such as supply chain disruptions, vendor delays, regulatory restrictions, natural disasters, or geopolitical issues, may adversely impact our production schedules. Such disruptions could result in increased procurement costs, delays in fulfilling customer orders, loss of customer confidence, and reputational damage. Additionally, prolonged interruptions could negatively affect our business operations, cash flows, results of operations, and financial condition. While we endeavor to maintain relationships with multiple suppliers to mitigate this risk, we cannot guarantee that these measures will eliminate potential supply disruptions. Any inability to manage such risks effectively could have a material adverse effect on our business.

However, to safeguard the company's operations, we are maintaining effective supply chain management practices which establishes contingency plans and building strong relationship with our suppliers to ensure a steady and reliable supply of Raw materials

11. Our Company operations require significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our Company's business operations require a significant amount of working capital, primarily to finance our inventory, including the purchase of raw materials. In the event, we are unable to source the required amount of working capital, we might not be able to efficiently satisfy the demand of our

clients in a timely manner or at all. Even if we are able to source the required amount of funds, it would be difficult for us to assure that such funds may or may not be sufficient to meet our cost estimates, which could have adverse effect on our financial conditions and results of operations. There exist substantial requirement of working capital and financing in the form of fund and non-fund based working capital facilities to meet our requirements. The details of our working capital for period ended September 30, 2024 and Financial Year ended March 31, 2024, March 31, 2023 and March 31, 2022 are Rs. 1035.69 lakhs, Rs. 1241.98 lakhs, 1009.53 lakhs and 990.79 Lakhs respectively, which is showing continuous increase.

16. Our Company has in the past entered into related party transactions and may continue to do so in the future.

Our Company has engaged in the past, and may engage in the future, in transactions with related parties, inter alia, including our Promoters, Key Managerial Personnel and their relatives on an arm's length basis. Such transactions include remuneration, advances etc.

During the half year ended September 30, 2024 and for the financial year ended March 31st, 2024, March 31st, 2023 and March 31st, 2022, our Company had entered into related party transactions, which were in compliance with the applicable provisions of the Companies Act, 2013, applicable accounting standards and other statutory requirements. For details of our related party transactions, see '**Restated Financial Information-Related Party Transaction**' at page 385.

(Rs. in Lakhs)

Particulars	Half year ended September 30, 2024	Year ended March 31, 2024	Year ended March 31, 2023	Year ended March 31, 2022
Sum of all related party transactions	387.29	410.63	508.07	883.41
Revenue from Operations	1723.68	3615.09	3120.52	2987.75
Sum of all related party transaction as a % of revenue from operations	22.47%	11.36%	16.28%	29.56%

We confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws. While we believe that all our related party transactions have been conducted on an arm's length basis as per the Companies Act, 2013 and acknowledge that achieving more favorable terms might have been possible without entering into related party transactions, it's important to note that such transactions are a part of our business landscape. Looking ahead, we anticipate engaging in related party transactions in the future. Our commitment to

transparency and prudent management positions us to effectively navigate these transactions, minimizing any potential adverse effects on our financial condition and results of operations. For further details, please refer to chapter titled “**Financial Information– Restated Financial Statements – Note 39 – Related Party Disclosures**” on page 380 of the Draft Red Herring Prospectus.

17. We face foreign exchange risks that could adversely affect our results of operations, further having an impact on our cash flows and our financial results may fluctuate.

We derive around 23-25% of our operating revenue from export markets which are generally denominated in United States Dollars and other Foreign Currencies. We face foreign exchange rate risk as we export our products to other countries. Because of our foreign currency exposure, exchange rate fluctuations between the Indian Rupee and foreign currencies can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to fluctuate in the future. We generally receive a part of payment from the customers in advance, while others make the payment over a period of time through Letter of Credit (“LC”), which are subject to depositing the documents for collection within due time line and acceptance by the foreign banks and receipt of inward remittance against exports. This gap results in increased risk towards foreign exchange fluctuation. As we intend to expand our product base and also our geographical markets, we will have greater exposure to such exchange rate fluctuations. We may, therefore, suffer losses on account of foreign currency fluctuations for sale of our products since we may not be able to pass on all losses on account of foreign currency fluctuations to our customer.

Particulars	September 30, 2024	% of Revenue	March 31,2024	% of Revenue	March 31,2023	% of Revenue	March 31,2022	% of Revenue
Domestic Sales	1330.31	77%	2768.13	77%	2393.2	77%	2222.09	74%
Export Sales	393.37	23%	846.96	23%	727.32	23%	765.66	26%
Total revenue	1723.68	100%	3615.09	100%	3120.52	100%	2987.75	100%

To manage the foreign exchange risks that could adversely impact our results of operations, cash flows, and financial performance, going forward we might look to deploy a structured hedging strategy using forward contracts and other derivative instruments to manage currency exposure. Additionally, we will also closely monitor foreign exchange rate movements and align our pricing strategies to reflect currency fluctuations. Regular risk assessments and proactive financial planning further strengthen our ability to minimize the impact of foreign exchange volatility on our business operations and financial results.

18. We are dependent on third-party transportation providers for the supply of materials for our manufacturing process and delivery of our finished products. If we are required to expend considerable resources in addressing our distribution requirements, it could adversely affect our results of operations.

The supply and transportation of raw materials, equipment for our manufacturing facilities, and finished products to our customers and franchisees are subject to various uncertainties and risks. We rely on third-party freight and transportation providers for these deliveries. Transportation disruptions, such as strikes, accidents, or natural disasters, could adversely impact the timely supply of materials to our manufacturing facilities and the delivery of finished products to customers. Additionally, materials,

components, or finished products may be lost or damaged in transit, leading to potential delays or financial losses. Such challenges could negatively impact our business operations and results.

Moreover, we have tied up with multiple transportation providers to safeguard against any such uncertainty and reduce reliance on any single source and negotiating long-term contracts to lock in favorable rates and secure service availability. Implementing a logistics management system can enhance visibility into transportation costs and performance, enabling more efficient routing and timely adjustments. Additionally, diversifying supply chain routes and building strategic inventory reserves can buffer against transportation disruptions. Collaborating with stakeholders to advocate for improvements in infrastructure can also help address broader systemic issues.

19. Our business requires us to obtain and renew certain licenses and permits from government and regulatory authorities, the failure to obtain or renew them in a timely manner may adversely affect our business operations.

Our company is ISO 13485:2016 certified and engaged in the design, development, and manufacturing of surgical tapes and medical disposables. To operate, we must obtain and periodically renew various approvals, licenses, registrations, and permits from regulatory authorities, including the Government of India, State Governments, and other agencies. Notably, we are awaiting approval under the Legal Metrology Act, 2011, from the Government of Odisha. We have already applied for this license and same is under process as on date.

We are committed to ensuring full compliance with all regulatory requirements governing our business operations. We have established a robust system for tracking the expiration dates and renewal processes of all relevant approvals. We proactively apply for renewals well in advance and maintain strong relationships with the relevant authorities to expedite the approval process. These efforts help minimize the risk of operational disruptions and ensure the continued smooth functioning of our business.

For further details of the approvals yet to be obtained by us, and please see the chapter titled ***“Government and Other Statutory Approvals”*** beginning on page 426.

20. We have taken guarantees from Promoters and members of Promoter Group in relation to debt facilities provided to us.

We have taken guarantees from Promoters and members of Promoter Group in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. In the event of challenges in obtaining satisfactory guarantees, we are prepared to explore alternative solutions, including the possibility of repaying outstanding amounts under existing facilities or seeking additional sources of capital. This proactive approach positions us to address potential financial hurdles effectively, contributing to the resilience of our financial condition. For more information, please see the chapter titled **“Financial Indebtedness”** beginning on **page 418** of this Draft Red Herring Prospectus.

To effectively manage the risks associated with relying on guarantees from promoters and members of the promoter group for debt facilities, we ensure that these guarantees are documented with clear terms and conditions, outlining the scope and extent of the commitments made by the promoters. Regularly reviewing and assessing the financial health and creditworthiness of the promoters helps to gauge their ability to honor these guarantees should the need arise. Establishing a contingency plan, which includes alternative financing options or backup arrangements, provides an additional layer of security in case the guarantees are called upon. Moreover, maintaining transparent communication with financial institutions

about the reliance on such guarantees and the company's overall risk management framework can build trust and facilitate better negotiation of terms. By implementing these measures, the company can better manage the risks associated with promoter guarantees, ensuring financial stability and protecting against potential adverse impacts on its operations and credit worthiness.

22. The Objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution.

The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled “**Objects of the Offer**” beginning on **page 151** of the Draft Red Herring Prospectus. Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings. We propose to utilize the Net Proceeds for purposes identified in the Chapter titled “**Objects of the Offer – Requirement of Funds and Utilization of Net Offer Proceeds**” on Page No. 152 of this Draft Red Herring Prospectus.

Our Promoters and controlling shareholder shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects at such price and in such manner as may be prescribed by SEBI in this regard. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the Objects of the Offer is lower than the proposed deployment, such balance will be used for future growth opportunities, including funding other existing objects, if required. If estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

23. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Offer size above Rs. 10,000.00 Lakhs. Since this Issue Size is less than Rs. 10,000.00 Lakhs, our Company has not appointed any monitoring agency for this Offer. Hence, we have not appointed a monitoring agency to monitor the utilization of Offer proceeds. However, Audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

24. *We generally do business with our customers on short term order basis and do not enter into long- term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Except one customer our company neither has any long term or short-term contracts with any of customers nor has any marketing tie up for our products or services. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. While the Company benefits from long-standing relationships with both customers and suppliers, it's important to note that this stability has contributed to a track record of successfully navigating challenges in the past. This enduring rapport has fostered a culture of trust and collaboration, enabling the Company to address any hurdles with resilience.

While our business primarily operates on a short-term order basis without long-term contracts, we focus on diversifying our customer base across multiple industries and geographies, reducing dependency on any single client. Additionally, we maintain strong relationships with repeat customers by consistently delivering high-quality services and ensuring timely execution of projects. Furthermore, our continued focus on expanding our market presence, enhancing service offerings, maintaining customer relationship helps us secure a steady flow of orders, ensuring business sustainability and growth.

25. *Our Promoters, Directors, Key Managerial Personnel and members of Senior Management are interested in our Company other than reimbursement of expenses or normal remuneration or benefits which may result in a conflict of interest with us.*

Our Promoters, some of our Directors, Key Managerial Personnel and Senior Management may be regarded as having an interest in us other than reimbursement of expenses incurred and normal remuneration or benefits. Our Promoters, Directors, and certain Key Managerial Personnel and members of Senior Management may be deemed to be interested to the extent of Equity Shares held by them as well. We cannot assure you that our Promoters, Directors, Key Managerial Personnel and members of Senior Management will exercise their rights for the benefit, or in the best interests of our Company. For further details, see “*Our Management*” and “*Capital Structure*” on pages 299 and 99, respectively.

26. *Our business will suffer if we fail to keep pace with rapid changes in technology and the industries on which we focus*

The industry we cater is characterized by rapid technological changes, evolving industry standards, changing client preferences that could result in product obsolescence and short product life cycles. The

Electrical and Automation industry is characterized by rapid technological changes, evolving industry standards, changing customer preferences that could result in short product life cycles. The success of our business depends on our ability to innovate and continuously provide services that address the varied and expanding requirements of our customers. Failure to attract and retain highly skilled IT professionals could hinder our ability to adequately staff projects, and an inability to compete for such talent may significantly impact our business, financial condition, and operational results. Our future success will depend on our ability to enhance our existing offerings or develop new customized, to meet customer needs, in each case, in a timely manner. We continuously strive to anticipate and promptly address our customers' needs in a cost-effective manner. Our reward and recognition program further supports our commitment and motivate our workforce. While we are committed to fostering demand for our innovative products and services, we recognize the dynamic nature of the market. However, we haven't faced any such issues in the past as we remain agile in adapting our strategies to align with emerging technologies and changing market trends. Our dedication to research, customer feedback, and technological advancements empowers us to continually enhance our offerings. For more details, please refer to the Chapter titled "**Our Business**" on Page No. 220 of this Draft Red Herring Prospectus.

27. *Our operations may be adversely affected in case of industrial accidents, physical hazards and similar risks at our construction sites, which could expose us to material liabilities, loss in revenues and increased expenses.*

While manufacturing companies, including us, conduct various scientific and site studies during the course of bidding for projects, there are always anticipated or unforeseen risks that may arise due to adverse weather conditions, geological conditions, specification changes and other reasons. Additionally, our operations are subject to hazards inherent in providing engineering and construction services, such as risk of equipment failure, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Use of heavy machineries, handling of sharp parts of machinery by laborers during construction activities etc. may result in accidents, causing injury to our laborers, employees or other persons on the site and may prove fatal. However, our policy of covering these risks through contractual limitations of liability, indemnities and insurance may not always be effective and this may have a material adverse effect on our reputation, business, financial condition and results of operation. However, we haven't faced any such issues in the past as we continuously adopt and implement safety strategies, assess potential risks by providing regular training and conducting emergency drill.

EXTERNAL RISK FACTORS

28. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. The regulatory and policy environment in which we operate is evolving and subject to change. These changes may pose challenges to our business, impacting our operational results and future prospects. It's imperative that we remain agile in our response to and compliance with any shifts in applicable laws and policies. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of these laws on a short notice or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST.

29. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and other prospects.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

30. Changes in the Government Policy could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

31. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. While we acknowledge the potential challenges, we remain proactive in exploring avenues to manage any additional costs effectively. We continuously seek opportunities to enhance our revenue streams, ensuring sustained growth and profitability despite potential inflationary impacts. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition

32. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operation.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any

financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

33. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's or central government's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

34. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

35. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business and the trading price of the Equity Shares.

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or financial policy or a decrease in India's foreign exchange reserves. India's foreign exchange reserves have grown consistently in the past. (Source: Reserve Bank of India). However, any decline in foreign exchange reserves could adversely affect the valuation of the Indian Rupee and could result in reduced liquidity and higher interest rates that could adversely affect our future financial performance and the market price of the Equity Shares and could result in a downgrade of India's debt ratings. Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may

adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could adversely affect our business and future financial performance and our ability to obtain financing to fund our growth, as well as the trading price of the Equity Shares.

36. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”).

Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition. Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that Fiscal/period and in the corresponding (restated) Fiscal/period in the comparative Fiscal/period.

37. The occurrence of Hostilities, terrorist attacks, civil unrest and other acts of violence or force majeure could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war or other force majeure events may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

38. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

39. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017. STT had been paid at the time of acquisition of such equity shares, except in the case of such acquisitions where STT could not have been paid, as notified by the Central

Government. However, as on the date of this Prospectus, the Central Government has not issued any such notification. Due to uncertainty in the applicability of this provision, the shareholders may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

40. *We derive majority of our income from our customers within India. Therefore, factors that adversely affect the demand for our manufacturing and services in India may adversely affect our business.*

We have in the past derived and believe that we will continue to derive, a significant portion of our income from our customers within India. In addition, all of our employees are based in India. Consequently, factors that adversely affect the Indian economy or the demand for our manufacturing and services within India, may adversely affect our business and profitability.

41. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

42. *We may be affected by competition laws and any adverse application or interpretation of the Competition Act could adversely affect our business and activities.*

The Competition Act, 2002, as amended (the "Competition Act"), regulates practices having an appreciable adverse effect on competition in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an appreciable adverse effect on competition is considered void and results in the imposition of substantial monetary penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or provision of services, shares the market or source of production or provision of services by way of allocation of geographical area, type of goods or services or number of clients in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an appreciable adverse effect on competition. The Competition Act also prohibits abuse of a dominant position by any enterprise. The Competition Act aims to, among others, prohibit all agreements and transactions which may have an appreciable adverse effect on competition in India. Further, the Competition Commission of India ("CCI") has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or

combination has an appreciable adverse effect on competition in India. The applicability or interpretation of the Competition Act to any merger, amalgamation or acquisition proposed or undertaken by us, or any enforcement proceedings initiated by CCI for alleged violation of provisions of the Competition Act may adversely affect our business, financial condition or results of operation.

43. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

44. Wage pressures and increases in operating costs in India may prevent us from sustaining our competitive advantage and may reduce our profit margins.

Wage and operating expenses increase in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. Wages in India are increasing at a faster rate than in the developed economies, which could result in increased employee benefit expenses. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Further, The Code on Wages, 2019 received the assent of the President of India on August 8, 2019 and proposes to subsume four existing laws namely, the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. The provisions of this code will be brought into force on a date to be notified by the Central Government. This may impact our wage structure and may lead to increased wage payments to our employees. Additionally, the cost of operating expenses is also increasing as India continues to grow. Compensation increases manifest a hike in operational costs which may result in a material adverse effect on our business and financial condition and result of operations.

Risks Related to the Equity Shares

45. The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may

not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through the Book Building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the Stock Exchanges, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

46. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors,
- Adverse media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts; and
- Significant developments in India's economic and fiscal policies;

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

47. The requirements of being a publicly listed company may strain our resources

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by the shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business prospects, financial condition, results of operations, and cash flows. In addition, we may need to

hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

48. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Offer Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Offer Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor.

49. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such preemptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be offered to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company may be reduced.

50. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with 55 depository participants could take approximately two Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can

be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor.

51. *Non-resident investors are subject to investment restrictions under Indian laws, which limit the ability to attract foreign investors, which may adversely impact the market price of Equity Shares*

Foreign ownership of Indian securities is subject to Government regulation. Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or does not fall under any of the exceptions specified by the RBI, then prior approval of the RBI will be required. Further, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

Additionally, shareholders who seek to convert the Indian Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no objection or a tax clearance certificate from the Indian income tax authority. We cannot assure investors that any required approval from the RBI or any other Indian government agency can be obtained on any particular terms, or at all.

Further, pursuant to Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, can only be made through Government approval route, as prescribed in the Consolidated FDI Policy and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. The Company cannot assure investors that any required approval from the RBI or any other government agency can be obtained on any particular terms, or at all. For further details, please see “*Restriction on Foreign Ownership of Indian Securities*” on page 515

* The amount utilized for general corporate purposes shall not exceed 15% of the Gross Proceeds of the Offer.

The requirement and deployment of funds as indicated above are based on our current business plan, internal management estimates, prevailing market conditions and other commercial and technical factors, including interest rates and other charges, and the financing and other agreements entered into by our Company, and have not been appraised by any bank or financial institution. Given the dynamic nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations and configuration of the project, increase in input costs of construction materials and labour costs, logistics and transport costs, incremental preoperative expenses, taxes and duties, interest and finance charges, engineering procurement and construction costs, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose, at the discretion of our management, subject to compliance with applicable law. Moreover, if the actual utilization towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 15% of the gross proceeds from the Fresh Offer in accordance with the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated

cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals, general corporate purposes and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Fresh Offer. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

For further details of factors that may affect these estimates, see “**Risk Factors**” on page 50 of the Draft Red Herring Prospectus.

The justifications for the holding levels mentioned in the table above are provided below:

Asset-Current Assets	
Trade Receivables	Our company generally sold goods on credit to our customers for a credit period of 88 days, 95 days and 83 days in the FY 2021-22, 2022-23 and 2023-24 which is as per the acceptable business practice in the similar trade. The debtors are projected to 68 and 60 days for the FY 2024-25 and FY 2025-26 respectively. Our management believes that the proposed credit period to our customers is reasonable for our business operations.
Inventories	Raw Material: Our Company procures raw material which is essential for manufacturing the product. In the FY 2021-22, 2022-23 and 2023-24, our Company had maintained raw material inventory levels for 39 days, 37 days and 36 days respectively. Raw materials are majorly procured from certain domestic suppliers with whom our Company has long standing business relationships. We have maintained raw material for our continued production of Plaster of Paris Bandage and other Surgical Dressings supply. For the year ended on March 31, 2025 holding period is estimated to be at 36 days mainly due to management

	<p>aims to reduce carrying costs and improve overall operational effectiveness in the Company. Raw materials are majorly procured from certain domestic suppliers (Own and Other Brands) and also export sales with whom our Company has long standing business relationships. For FY 2025-26 holding period is estimated to decrease slightly to 30 days as we project in improving our supply chain facilities to support our increased sale and therefore keeping optimum level of Raw material ready for process.</p>
	<p>WIP: For FY 2021-22, FY 2022-23 and 2023-24, WIP inventory level has been maintained at 8 days, 12 days and 17 days respectively. Further, our WIP holding levels is estimated to 18 days and 15 days in the FY 2024-25 and FY 2025-26 respectively.</p>
	<p>Finished Goods: In the FY 2021-22, 2022-23 and 2023-24, our Company maintained finished goods inventory levels for 9 days, 15 days and 16 days respectively. All the products manufactured by our Company are based on orders placed by the customers and the finished goods are dispatched as and when they are packed. Since Our Company is into the manufacturing sector, sufficient volume of Finished Goods needs to be maintained. However, we estimate finished goods inventory to remain at 16 days for FY 2024-25 and 14 days for FY 2025-26</p>
Liabilities-Current Liabilities	
Trade Payables	<p>Company's trade payables predominantly comprise of payables towards purchase of raw materials, consumables and finished goods. The trade payable days were approximately 66 days, 68 days and 47 days of purchases for FY 2021-22, 2022-23 and 2023-24, respectively. The trade payable outstanding has been estimated to reduce to 24 days in FY 2024-25 and with further reduction to 18 days in FY 2025-26. Our Company has proposed to utilize whole of the fresh issue proceeds towards working capital requirements during the financial year 2026, for meeting operational expenses. The company proposes to negotiate on terms of earlier payment, in order to avail materials at favorable rates from its trade payables.</p>

Justification for increase working capital requirement in FY 2024 compared to FY 2023.

Our Company is engaged in the manufacturing and sale of Plaster of Paris Bandage and other Surgical. Our Inventory was ₹ 616.63 lakhs as on March 2024 which is due to the increase in turnover in FY 24 compared to FY 23. Due to our past business model, the operational cycle tends to be shorter, leading to faster conversion of credit sales into cash. The same is evidenced by our trade receivable cycle which is reduced from 95 days in FY 23 to 84 days in FY 24. As our business increased its operations, we require to maintain higher inventory levels to ensure uninterrupted manufacturing process. As a result, inventory (Raw material, WIP and Finished Goods) which was ₹ 486.43 Lakhs in FY 2023 increased to ₹ 616.62 Lakhs in FY 2024. Increase in working capital is also due to increase in advance to suppliers in order to avail better and favorable payment terms and timely supply of the raw material. Advance to suppliers might offer discounts or preferential pricing in exchange for early payments or guaranteed orders. This can help to reduce their raw material costs and improve profit margins. To summarize, the working capital requirement increases compared to FY 2023 by ₹ 249.54 Lakhs.

Working Capital requirement for the FY 2025 will be ₹1,553.34 Lakhs as per projected financials in comparison to ₹ 1241.97 Lakhs in FY 2024 on restated basis. Such increase amounts are majorly due to increase of inventory, trade receivables, short term loan and advances and decrease in trade payable. The Company shall use the machinery to install a surgical cotton roll making plant. The Stapes of operations are as follows:

Stage 1: Pre-cotton Cleaning line

Purpose of the Pre-cotton Cleaning Line:

The first stage in the plant comprises of pre-cotton cleaning line, wherein the raw cotton is fed in the machines, opened and is cleaned from macro dust to provide surgical grade cotton free from all impurities. Major machines used in the cleaning line includes, Six Beater Machine, Fine opening Machine, Metal Detector and High-Speed Condenser.

Process efficiency:

The pre-cleaning cotton line machines will improve the efficiency of the present plant by upto 400 kgs/hr. and also help in detection of non-ferrous metallic impurities which may be present in raw cotton.

Specifications and use of major machines:

Six Beater Machine:

The machine is fitted with 5HP motor for beater, 1HP Lattice gear motor and 5HP suction motor. The inclination angle is 45degrees and the diameter is 268mm. It is used in the blowroom stage to effectively open up tightly packed cotton bales by aggressively beating the fibers with six rotating beaters, simultaneously removing macro dust from the raw cotton and is highly effective in opening of raw cotton and removal of waste with a production rate of upto 400kgs/hr.

Fine Opening Machine:

The Fine Opening machine also known as bale openers loosens the raw cotton fibres and breaks up clumps. This machine helps the cotton for further cleaning and processing.

Metal Detector Machine:

The metal detector machine detects non ferrous metals like copper, aluminum and other such metals present in the raw cotton.

High Speed Condenser:

The Machine comes with 2HP drum driving motor and 5HP suction motor and help in faster movement of raw cotton from bale plucker to step cleaner.

Stage 2: Bleaching Cotton

Purpose of the Bleaching Line:

The second stage in the plant comprises of bleaching line, which is a fully automatic process. In this line, the material comes from the fibre feeding machine to the fibre pressing machine. Once the cotton fiber is pressed, it moves to the Kier boiler (500 Kg) via fibre carrier. The heated cotton fibre is rewashed and bleached and then dried. The major machines used in this process are Fibre Carrier, Fibre Pressing machine, Surgical Cotton Kier, Hydro extractor, Fibre Drier machine and steam boiler.

Process efficiency:

The bleaching line will improve the efficiency of the present plant in faster conversion of raw cotton into fibre and bleaching of the fibre.

Specifications and use of major machines:

Fibre Carrier:

The fibre carrier has a capacity of 750kgs per hour and helps in faster carriage of cleaned raw cotton to Kier boiler.

Fibre Pressing Machine:

The Fibre Pressing Machine compresses raw cotton into dense and standardized bales for easier storage, transport, and handling. It further reduces wastage.

Surgical Cotton Kier:

The 500 Kg Cotton Kier comes with 60HP main pump and 3 HP injection pump. The main Kier OD is 1650 mm and carrier OD is 1600 mm. The material specification used in the Kier is SS316L. Further, it comes with 5 types of lock features for additional safety. It is used to bleach and scour cotton to achieve the desired quality and finish using high temperature and high-pressure oxygen. The machine uses energy efficient circulation pumps to shorten the process time and reduce production costs.

Hydro Extractor:

The hydroextractor to be used by the Company shall be of 250Kgs with a 15HP main motor. The main drum OD is 1300 mm and machine height is 4 feet. It is used to remove excess water from wet materials, like textiles, by spinning them at high speed in a perforated drum, utilizing centrifugal force to quickly extract moisture.

Fibre Drier Machine:

The Fibre Drier Machine has a capacity of 150 Kgs per hour with a motor capacity of 30HP for high

speed drying under a controlled temperature.

Steam Boiler:

The Steam Boiler has a capacity of 2000 kgs per hour and is suitable for 500 kg Kier.

Stage 3: Surgical Roll Making

Purpose of the Surgical Roll Making Line:

The second stage in the plant comprises of Surgical Roll Making line, which is a fully automatic process. In this line, the material comes from the circular bale plucker. The unit consists of high speed condenser, six beater machine, material feeding machine and fire detector as the outer part and carding, rolling and cutting machines as part of the inner units. The purpose of a surgical roll making line is to produce sterile, high-quality surgical cotton rolls for medical use. The major machines used in this line are Circular Bale plucker, Fine Opening Machine, High Pressure Chute, Surgical carding, rolling and cutting machines.

STATEMENT OF SPECIAL TAX BENEFITS AVAILABLE TO THE COMPANY AND TO THE SHAREHOLDERS OF THE COMPANY UNDER THE DIRECT TAX LAWS

Outlined below are the special tax benefits available to the Company and to its shareholders under the Income-tax Act, 1961 ('the Act') as amended by the Finance Act (No.2) 2024, i.e., applicable for the Financial Year 2024-25 relevant to the Assessment Year 2025-26, as amended and presently in force in India (together, the "Direct Tax Laws").

A. SPECIAL DIRECT TAX BENEFITS AVAILABLE TO THE COMPANY

1. Lower corporate tax rate under section 115BAA of the Income Tax Act, 1961

A new section 115BAA has been inserted in the Act by the Taxation Laws (Amendment) Act, 2019 ("the Amendment Act, 2019") w.e.f. April 1, 2020 (A.Y. 2020-21). Section 115BAA grants an option to a domestic company to be governed by the section from a particular assessment year. If a company opts for section 115BAA of the Act, it can pay corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and education cess of 4%). Section 115BAA of the Act further provides that domestic companies availing the option will not be required to pay Minimum Alternate Tax (MAT) on their 'book profits' under section 115JB of the Act.

However, such a company will no longer be eligible to avail specified exemptions/ incentives under the Act and will also need to comply with the other conditions specified in section 115BAA. Also, if a company opts for section 115BAA, the tax credit (under section 115JAA), if any, which it is entitled to on account of MAT paid in earlier years, will no longer be available. Further, it shall not be allowed to claim set-off of any brought forward loss arising to it on account of additional depreciation and other specified incentives.

The Company has evaluated and opted for the lower corporate tax rate of 25.168% (prescribed under section 115BAA of the Act) with effect from Assessment Year 2019-20.

2. Deduction in respect of inter-corporate dividends - Section 80M of the Income Tax Act, 1961

Up to 31st March 2020, any dividend paid to a shareholder by a company was liable to Dividend Distribution Tax ("DDT"), and the recipient shareholder was exempt from tax under section 10(34) of the Act. Pursuant to the amendment made by the Finance Act, 2020, DDT stands abolished, and dividend received by a shareholder on or after 1st April 2020 is liable to tax in the hands of the shareholder. The Company is required to deduct Tax Deducted at Source ("TDS") at applicable rate specified under the Act read with applicable Double Taxation Avoidance Agreement (if any). With respect to a resident corporate shareholder, a new section 80M has been inserted in the Act to remove the cascading effect of taxes on inter-corporate dividends during FY 2020-21 and thereafter. The section provides that where the gross total income of a domestic company in any previous year includes any income by way of dividends from any other domestic company or a foreign company or a business trust, there shall, in accordance with and subject to the provisions of this section, be allowed in computing the total income of such domestic company, a deduction of an amount equal to so much of the amount of income by way of dividends received from such other domestic company or foreign company or business trust as does not exceed the amount of dividend distributed by it on or before the due date. The "due date" means the date one month prior to the date for furnishing the return of income under sub-section (1) of section 139 of the Act.

3. Buyback of shares - Section 115QA of the Income Tax Act, 1961

Any amount distributed by the Company pursuant to buyback of shares undertaken prior to October 1, 2024, from its shareholders shall be liable to buyback tax at 23.296% in the hands of the Company on distributed income (buyback price less issue price). Further, such transaction shall be exempt in the hands of the shareholders under section 10(34A) of the Act.

Pursuant to amendment in Finance Act (No.2) 2024, the provisions of section 115QA shall not apply for buy back of shares which takes place on or after October 01, 2024. Thus, there would be no tax on buy back for the Company effective from October 01, 2024.

Further, the Company is required to withhold tax at 10% provided the aggregate amount of dividend to the resident shareholders exceeds ₹ 5,000 during the financial year. Further, for non-resident shareholders tax shall be withheld at 20, subject to benefit under Double Taxation Avoidance Agreement.

B. SPECIAL DIRECT TAX BENEFITS AVAILABLE TO THE SHAREHOLDERS OF THE COMPANY

1. Dividend income earned by the shareholders would be taxable in their hands at the applicable rates for resident shareholders. Further, as per Section 115A of the Act, a non-resident (not being a company) or of a foreign company, includes any income by way of Dividend, the amount of income-tax calculated on the amount of income by way of dividends shall be at the rate of 20% subject to fulfilment of prescribed conditions under the Act.
2. In case of domestic corporate shareholders, deduction from dividend income would be available under Section 80M of the Act on fulfilling the conditions (as discussed above). Further, in case of shareholders who are individuals, Hindu Undivided Family, Association of Persons, Body of Individuals, whether incorporated or not, surcharge would be restricted to 15% (instead of peak surcharge rate of 37%), irrespective of the amount of dividend.

Further, no deduction shall be available against dividend income resulting from buy-back of shares.
4. As per Section 112A of the Act, long-term capital gains arising from transfer of an equity share, or a unit of an equity oriented fund or a unit of a business trust, which takes place before July 23, 2024, shall be taxed at 10% (without indexation) of such capital gains subject to fulfilment of prescribed conditions under the Act and Notification No. 60/2018/F.O.370142/9/2017-TPL dated 1 October 2018. Further, where the tax payable is payable in respect of any income arising from the transfer of a long-term capital asset, being listed securities or zero-coupon bond, which takes place before July 23, 2024 then such income will be subject to tax at the rate of 10% of the amount of capital gains before giving effect to the provisions of the second proviso to section 48.

Further, in case of non-resident, capital gain shall be computed without giving effect to first and second proviso to section 48, except in case listed securities or zero-coupon bond, where first proviso of section 48 is available.

Further, post enactment of Finance Act (No.2) 2024, capital gains arising from transfer of capital assets held for more than 12 months shall be considered as Long-Term Capital gain, else short term capital gain.

6. As per Section 111A of the Act, short term capital gains arising from transfer of an equity share, or a unit of an equity-oriented fund or a unit of a business trust which takes place before July 23, 2024 shall be taxed at 15% subject to fulfilment of prescribed conditions under the Act.

Also, no deduction from such dividend income shall be allowed.
8. Further, section 46A deems full value of sale consideration of shares bought back as nil and consequently, cost of acquisition of shares bought back would be allowed as capital loss unless such shares are held as stock-in-trade. GLOBAL ECONOMIC OVERVIEW

Global growth is expected to remain broadly flat— decelerating from 3.3 % in 2023 to 3.1 % by 2029— and is largely unchanged from World Economic Outlook forecasts in April 2024 and October 2023. Under the surface, however, offsetting revisions have brought major economies closer together as cyclical forces wane and GDP moves closer to potential. As inflation recedes, policy rates are expected to follow suit, preventing undue increases in real interest rates. Interest rates are expected to gradually descend toward their natural levels: the levels of risk-free real interest rates compatible with output at potential and inflation at target. Although global revisions to the forecast since April have been minimal, offsetting shifts at the country group level reflect recent shocks and policies, most notably in emerging market and developing economies. Cuts in production and shipping of commodities (oil in particular), conflicts, and civil unrest have led to downward revisions to the regional outlooks for the Middle East and Central Asia and for sub-Saharan Africa. At the same time, surging demand for semiconductors and electronics, driven by significant investment in artificial intelligence, has fueled stronger growth in emerging Asia.

Following a reopening rebound in 2022, growth in advanced economies markedly slowed in 2023 and is projected to remain steady, oscillating between 1.7 % and 1.8 % until 2029. This apparent stability conceals differing country dynamics as various cyclical forces unwind and economic activity gets back in

line with potential. In the United States, growth is expected to decelerate, with output reaching potential from above by 2029. In the United Kingdom and the euro area, on the other hand, activity is projected to accelerate, closing the output gap from below. In Japan, where the output gap is already closed, GDP is expected to grow in line with potential.

- In the United States, projected growth for 2024 has been revised upward to 2.8 %, which is 0.2 percentage point higher than the July forecast, on account of stronger outturns in consumption and nonresidential investment. The resilience of consumption is largely the result of robust increases in real wages (especially among lower-income households) and wealth effects. Growth is anticipated to slow to 2.2 % in 2025 as fiscal policy is gradually tightened and a cooling labor market slows consumption. With GDP growth lower than potential, the output gap is expected to start closing in 2025.
- In the euro area, growth seems to have reached its lowest point in 2023. A touch weaker than projected in April and July 2024, GDP growth is expected to pick up to a modest 0.8 % in 2024 as a result of better export performance, in particular of goods. In 2025, growth is projected to rise further to 1.2 %, helped by stronger domestic demand. Rising real wages are expected to boost consumption, and a gradual loosening of monetary policy is expected to support investment. Persistent weakness in manufacturing weighs on growth for countries such as Germany and Italy. However, whereas Italy's domestic demand is expected to benefit from the European Union–financed National Recovery and Resilience Plan, Germany is experiencing strain from fiscal consolidation and a sharp decline in real estate prices.
- Offsetting dynamics are also at play among other advanced economies. Growth is expected to decelerate in Japan in 2024, with the slowdown reflecting temporary supply disruptions and fading of one-off factors that boosted activity in 2023, such as the surge in tourism. With respect to April, growth is revised downward, by 0.6 percentage point, to 0.3 % for 2024, reflecting a temporary supply disruption in the car industry and the base effect of historical data revisions. An acceleration to 1.1 is predicted in 2025, with growth boosted by private consumption as real wage growth strengthens. In the United Kingdom, in contrast, growth is projected to have accelerated to 1.1 % in 2024 and is expected to continue doing so to 1.5 % in 2025 as falling inflation and interest rates stimulate domestic demand.

Growth Outlook: Emerging Markets Get Support from Asia

In a manner similar to that for advanced economies, the growth outlook for emerging market and developing economies is remarkably stable for the next two years, hovering at about 4.2 % and steadying at 3.9 % by 2029. And just as in advanced economies, offsetting dynamics are occurring between country groups. Compared with that in April, growth in emerging market and developing economies is revised upward by 0.1 percentage point for 2024, reflecting upgrades for Asia (China and India) that more than offset downgrades for sub-Saharan Africa and for the Middle East and Central Asia.

- Emerging Asia's strong growth is expected to subside, from 5.7 % in 2023 to 5.0 % in 2025. This reflects a sustained slowdown in the region's two largest countries. In India, the outlook is for GDP growth to moderate from 8.2 % in 2023 to 7 % in 2024 and 6.5 % in 2025, because pent-up demand accumulated during the pandemic has been exhausted, as the economy reconnects with its potential. In China, the slowdown is projected to be more gradual. Despite persisting weakness in the real estate sector and low consumer confidence, growth is projected to have slowed only marginally to 4.8 % in 2024, largely thanks to better-than-expected net exports. Compared with that in April, the forecast has been revised upward by 0.2 percentage point in 2024 and 0.4 percentage point in 2025. Recent policy measures may provide upside risk to near-term growth.
- In contrast, growth in the Middle East and Central Asia is projected to pick up from an estimated 2.1 % in 2023 to 3.9 % in 2025, as the effect on the region of temporary disruptions to oil production and shipping are assumed to fade away. Compared with that in April, the projection has been revised downward by 0.4 percentage point for 2024, mainly the result of the extension of oil production cuts in Saudi Arabia and ongoing conflict in Sudan taking a large toll.

- In sub-Saharan Africa, GDP growth is similarly projected to increase, from an estimated 3.6 % in 2023 to 4.2 % in 2025, as the adverse impacts of prior weather shocks abate and supply constraints gradually ease. Compared with that in April, the regional forecast is revised downward by 0.2 percentage point for 2024 and upward by 0.1 percentage point for 2025. Besides the ongoing conflict that has led to a 26 % contraction of the South Sudanese economy, the revision reflects slower growth in Nigeria, amid weaker-than-expected activity in the first half of the year.

- In Latin America and the Caribbean, growth is projected to decline from 2.2 % in 2023 to 2.1 % in 2024 before rebounding to 2.5 % in 2025. In Brazil, growth is projected at 3.0 % in 2024 and 2.2 % in 2025. This is an upward revision of 0.9 percentage point for 2024, compared with July 2024 World Economic Outlook Update projections, owing to stronger private consumption and investment in the first half of the year from a tight labor market, government transfers, and smaller-than-anticipated disruptions from floods. However, with the still-restrictive monetary policy and the expected cooling of the labor market, growth is expected to moderate in 2025. In Mexico, growth is projected at 1.5 % in 2024, reflecting weakening domestic demand on the back of monetary policy tightening, before slowing further to 1.3 % in 2025 on a tighter fiscal stance. Overall, offsetting revisions leave the regional growth forecast broadly unchanged since April.

- Growth in emerging and developing Europe is projected to remain steady at 3.2 % in 2024 but to ease significantly to 2.2 % in 2025. The moderation reflects a sharp slowdown in Russia from 3.6 % in 2023 to 1.3 % in 2025 as private consumption and investment slow amid reduced tightness in the labor market and slower wage growth. In Türkiye, growth is expected to slow from 5.1 % in 2023 to 2.7 % in 2025, with the slowdown driven by the shift to monetary and fiscal policy tightening since mid-2023.

GLOBAL OUTLOOK

THE TRADE FORECAST IN DEPTH

Table 1 summarizes the WTO's projections for merchandise trade volume growth and real GDP growth at market exchange rates through 2025. If current assumptions hold, world trade will increase by 2.7% in 2024, slightly above the Organization's previous forecast of 2.6% from last April.

Asia's exports will grow faster than those of any other region this year, rising by as much as 7.4%. It will be followed by the Middle East (4.7%), South America¹ (4.6%), the CIS region² (4.5%), Africa (2.5%), North America (2.1%) and Europe (-1.4%). On the import side, the fastest growing region will be the Middle East (9.0%) followed by South America (5.6%), Asia (4.3%), North America (3.3%), the CIS region (1.1%), Africa (1.0%) and Europe (-2.3%).

The current forecast is premised on world market-weighted GDP growth of 2.7% in 2024 (up slightly from the 2.6% forecast in April). Economic growth will be fastest in Asia (4.0%), followed by the CIS region (3.8%), Africa (3.3%), North America (2.4%), the Middle East (1.9%), South America (1.8%) and Europe (1.1%).

In 2025, world GDP growth is expected to remain unchanged at 2.7% while world trade growth is expected to pick up slightly to 3.0%, due in part to the delayed positive contribution of the EU to global trade. Asia is forecast to lead other regions in export growth (4.7%) and import growth (5.1%). All regions should see trade flows increase in 2025 in volume terms except for a small decline in South American exports (-0.1%) and a larger decline in Middle East imports (-1.1%).

Merchandise exports of least developed countries (LDCs) are projected to increase by 1.8% in 2024, marking a slowdown from the 4.6% growth recorded in 2023. Export growth is expected to pick up in

2025, reaching 3.7%. Meanwhile, LDC imports are forecast to grow 5.9% in 2024 and 5.6% in 2025, following a 4.8% decline in 2023. These forecasts are underpinned by GDP growth estimates for LDCs of 3.3% in 2023, rising to 4.3% in 2024 and 4.7% in 2025.

Chart 6 shows quarterly merchandise export and import volume developments by region through the second quarter of 2025. Exports from Asia surged following the COVID-19 pandemic but have plateaued at a high level, partly explaining the region's weak export growth since then.

If the forecast is realized, by the second quarter of 2025 Asian exports will have risen 29.4% compared to their average level in 2019, followed by South America, North America and the Middle East with export growth over the same period of 10.1%, 9.1% and 5.7% respectively. African exports are expected to have declined by 1.8%, while European exports are projected to be 2.1% lower. Meanwhile, exports from CIS countries are expected to decline by 10.1% over the same period.

In terms of import growth, the CIS region is expected to see the largest increase between 2019 and mid-2025, with imports up 21.0%, followed by the Middle East at 19.3% and South America at 18.5%. Asia is forecast to experience a 17.6% increase in imports, while North America will see a gain of 15.1%. Africa's imports are set to rise just 2.0% over the same period, while Europe will be the only region to experience an outright decline in imports of -1.4%.

The policy mix appears to be improving and should, in time, provide more support for economic growth. However, the pivot to more accommodative monetary policy is not likely to usher in immediately faster growth everywhere. Globally, key growth drivers in developed economies for the remainder of this year and into next will be stronger inflation-adjusted income growth and progressively looser monetary policy.

Disinflation is likely to continue in developed economies as services and core inflation cools, and reduced labor shortages should translate into softer wage pressures. In September 2024, Eurozone headline inflation fell below the ECB's target for the first time in three years, while inflation in the U.S. continued

a broad downward path, settling just above the Fed's target, implying that both central banks may cut rates further this year.

A relatively more predictable inflation path should provide greater clarity around future monetary policy decisions, implying greater certainty for businesses. And if inflation stays under control, central banks may move to looser policy more quickly.

Global fiscal policy has been looser than expected this year, particularly in developed economies where we had expected debt pressures to limit government spending. In 2025, we think fiscal stimulus will be retrenched in countries where output is close to potential – in September, the IMF advised the U.S. and some European economies to start on a path of fiscal consolidation. Global bond yields have eased this year on the back of concerns over slowing growth in major economies and rising expectations of interest rate cuts. Increasing bond yields (borrowing costs) in France reflect concerns that the government has been unable to get its finances into order and reduce the burgeoning budget deficit.

Although our baseline forecast remains relatively positive, risks seem to have tipped to the downside as we move into Q4. The escalation of fighting in the Middle East may further disrupt shipping and trade and cause global inflation rates to increase – benchmark oil prices rose through early October as investors feared that the intensification of hostilities could broaden into a wider regional conflict. However, a persistent rise in global crude oil prices will likely be avoided, since the supply side is relatively unaffected. If the conflict remains relatively contained, the impact on global economic growth may be limited.

Deviations from the expected relatively smooth disinflation path could lead to interest rates following an expected path, which could in turn trigger volatility in financial markets. Keeping borrowing costs higher for longer would worsen the credit environment and put growth at risk; in the U.S., this would increase upward pressure on the dollar, with harmful spillover effects on emerging economies.

On the upside, inflation falling faster than expected could precipitate a quicker recovery in real incomes, which could provide a stronger boost to consumer confidence and spending. Central banks may loosen policy more quickly than expected, which will work out positively for businesses. The Dun & Bradstreet Q4 2024 Global Business Optimism Insights report reveals that business optimism is growing around the world, in anticipation of a favorable monetary policy environment globally. Over 75% of the 10,000 firms we surveyed told us they have strong confidence in sales and domestic and export orders. Our headline Global Business Optimism Index has shown consistent improvement over the year, implying that businesses have adapted well to the challenges of 2024, including tight monetary policy, the fallout of election-induced policy shifts, and supply chain disruptions.

Eastern Europe & Central Asia

Eastern Europe stands at a critical juncture of recovery, characterized by steady growth, declining inflation, and gradually accommodating monetary policies incentivizing further growth. As the region confronts geopolitical and labor market challenges, its focus on digital transformation, infrastructure investment, and human capital development will be essential in ensuring long-term economic resilience. Eastern Europe is projected to achieve GDP growth rates between 3.0% and 4.5% in 2024, supported by robust domestic consumption, a rebound in foreign investment, and a gradual recovery in export markets. Countries such as Poland, Romania, and the Czech Republic are expected to lead this growth, while nations such as Russia, Belarus, and Ukraine will experience war-driven economic demand. The average inflation rate across the region stands at approximately 4.5%, a substantial reduction from prior peaks, largely attributable to declining energy prices and enhanced supply chain efficiencies. Central banks are adopting a cautious approach, likely maintaining steady or slightly reduced interest rates to support economic growth while managing inflation expectations.

As recovery gains traction, the average unemployment rate in Eastern Europe is projected to decline to around 5.5% by the end of 2024. This reflects a tightening labor market, with sectors such as technology, healthcare, and skilled trades experiencing significant labor shortages.

Central Asia is projected to experience GDP growth rates ranging between 4.0% and 5.5% in 2024. This growth is primarily supported by robust demand for natural resources, particularly oil, gas, and minerals, which are vital to the economies of Kazakhstan and Turkmenistan. Additionally, increasing domestic consumption and investment in infrastructure projects are expected to bolster growth across the region. Uzbekistan and other countries are pursuing ambitious reforms aimed at enhancing economic productivity and attracting foreign investment, contributing to a more vibrant economic environment. The average inflation rate in Central Asia is anticipated to stabilize at around 6.5% in 2024, a moderation from previous peaks. This stabilization is attributed to improved supply chain conditions, lower food prices, and the gradual easing of global energy prices. Central banks across the region are likely to maintain a cautious monetary policy stance, with most expected to keep interest rates steady to support growth while monitoring inflationary pressures. The unemployment rate in Central Asia is projected to remain stable, averaging around 6.0% by the end of 2024.

INDIAN ECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices for Q1 2024-25 is estimated at INR 77.31 lakh crores (USD 928.9 billion) with growth rate of 9.7%, compared to the growth of 8.5% for Q1 2023-24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-September 2025, India's exports stood at USD 211.46 billion, with Engineering Goods (26.57%), Petroleum Products (16.51%) and electronic goods (7.39%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at USD 9.7 billion for the Q1 2024-25 from USD 8.9 billion in Q1 2023-24 or 1.1% of GDP. This was largely due to decrease in merchandise trade deficit.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of October 11, 2024, India's foreign exchange reserves stood at USD 690.43 billion.
- In 1H 2024, India saw a total of USD 31.5 billion in PE-VC investments.

INDIAN ECONOMIC OUTLOOK

The Indian economy continues to grow at a healthy pace despite challenging global conditions, according to World Bank's latest **India Development Update: India's Trade Opportunities in a Changing Global Context**. But to reach its USD1 trillion merchandise exports goal by 2030, India needs to diversify its export basket and leverage global value chains.

The India Development Update (IDU) observes that India remained the fastest-growing major economy and grew at a rapid clip of 8.2 % in FY23/24. Growth was boosted by public infrastructure investment and an upswing in household investments in real estate. On the supply side, it was supported by a buoyant manufacturing sector, which grew by 9.9 %, and resilient services activity, which compensated for underperformance in agriculture. Reflecting these trends, urban unemployment has improved gradually since the pandemic, especially for female workers. Female urban unemployment fell to 8.5 % in early FY24/25, although urban youth unemployment remained elevated at 17 %. With a narrowing of the current account deficit and strong foreign portfolio investment inflows, foreign exchange reserves reached an all-time high of USD 670.1 billion in early August, equivalent to over 11 months of cover (in FY23/24 import terms).

Amid challenging external conditions, the World Bank expects India's medium-term outlook to remain positive. Growth is forecast to reach 7 % in FY24/25 and remain strong in FY25/26 and FY26/27. With robust revenue growth and further fiscal consolidation, the debt-to-GDP ratio is projected to decline from 83.9 % in FY23/24 to 82 % by FY26/27. the current account deficit is expected to remain at around 1-1.6 % of GDP up to FY26/27.

The IDU also highlights the critical role of trade for boosting growth. The global trade landscape has witnessed increased protectionism in recent years. The post pandemic reconfiguration of global value chains, triggered by the pandemic, has created opportunities for India. The report emphasizes that India has boosted its competitiveness through the National Logistics Policy and digital initiatives that are reducing trade costs. However, it also notes that tariff and non-tariff barriers have increased and could limit the potential for trade focused investments.

The IDU recommends a three-pronged approach towards achieving the USD1 trillion merchandise export target by reducing trade costs further, lowering trade barriers, and deepening trade integration.

India's GDP grew by 6.7% year over year in the first quarter of fiscal 2024 to 2025 (that is, the quarter from April to June 2024), aligning with our projected range of 6.5% to 6.7%. Although this marks the slowest growth in five quarters, the Indian economy showed resilience, especially during the part of the quarter coinciding with the general elections.

The two methods of estimating economic activity are decoded as follows.

The expenditure approach points to strong private consumption growth, which grew 7.4% in the first quarter from a year earlier—a seven-quarter high. With inflation easing and stronger farm outputs, consumption spending recovered, especially in rural areas. Meanwhile, gross fixed-capital formation spending grew 7.5%, a strong rate despite election uncertainties, modest corporate profits, and substantial income repatriation from foreign capital flows. Exports grew 8.7% in the same period, primarily because of strong services exports. While goods exports did well, exports in certain segments—such as gems and jewelry—contracted and the momentum of higher-value goods remained strong. Imports grew 4.1% in the quarter, down from the 8.3% growth in the prior quarter, resulting in a positive net contribution of trade to GDP.

The production approach points to stronger-than-anticipated manufacturing activities, which grew 7%

year over year in the first quarter, and robust construction (10.5%), pushing India's gross value-added growth to a 6.8% annual rate in the first quarter of fiscal 2024 to 2025, compared with the prior quarter's 6.3%. After three consecutive quarters of poor growth, agriculture showed signs of recovery, growing at 2%: We believe this recovery will strengthen further as India receives plentiful rainfall this monsoon season. This bodes well for rural demand and growth in overall consumption spending during the festive season.

The resilient growth of 6.7 % in the first quarter amid political and economic uncertainties has increased our confidence in India's outlook this year, suggesting strong economic fundamentals driving economic activity. Five factors will drive growth in the next three quarters.

- Rural consumption spending is rebounding due to moderating inflation, specifically in food. Besides, better rainfall (over June to September, precipitation in the country as a whole was 109 % of its long-period average in 2020, and it has been the third highest since 1994) and all-time high production and stock of kharif crops (such as rice and paddy sown during the monsoon season from June to August) point to robust agricultural output this year, thereby further pushing rural demand. This will likely factor into spending during festive months and beyond.
- The government's reduced capital expenditures during the election will likely be made up for in the latter half of the year, thereby boosting the overall economy.
- Manufacturing sector capacity utilization is at an all-time high of 76.4 %, which suggests that private investments in the sector will pick up. Higher capex will also crowd in investments.
- Oil prices are expected to remain modest and range-bound, which will help reduce import bills and, therefore, the current account deficit. Besides, low oil prices will also reduce the cost of imported intermediate goods and raw materials, bringing down production costs.
- Last but not least, as US elections conclude in November and the Federal Reserve looks to ease monetary policy further by the end of the year, higher liquidity, policy stability, and a modest growth outlook in the United States could incentivize global investors and multinational corporations to invest outside the United States. India will likely benefit from these trends and see higher capital inflows translate into long-term investment and job opportunities.

We expect India to grow between 7 % and 7.2 % in fiscal 2024 to 2025 in our baseline scenario, followed by between 6.5 % and 6.8 % in fiscal 2025 to 2026 (admittedly, slightly lower than previously estimated). India's slightly slower growth in the subsequent year will likely be tied to broader global trends, including sluggish growth and a delayed synchronous recovery in the West, as anticipated earlier. Slowing global trade and supply chain disruptions due to intensifying geopolitical uncertainties will also affect demand for exports. Despite these challenges, we will continue to see the difference between actual GDP and no-COVID-19 levels progressively narrowing as growth picks up pace.

Inflation concerns are fading as expected, with better rainfall and proactive government interventions improving the food supply chain. Inflation may ease further in the latter half of the year. However, stronger growth may also pressure inflation as demand outpaces supply. We expect inflation to slowly revert to the Reserve Bank of India's target level of 4% from early next year and remain within its comfort zone over the forecast period.

GLOBAL PLASTER OF PARIS BANDAGE MARKET

The global plaster bandages market size was USD 8.8 Billion in 2023 and is projected to reach USD 14.9 Billion by 2032, expanding at a CAGR of 5.60% during 2024–2032. The market growth is attributed to the growing demand for effective healing solutions.

Increasing demand for effective wound care solutions is underscoring the importance of plaster bandages. These medical products, which provide support and protection to injured body parts, are a staple in healthcare settings worldwide. Plaster bandages find unique application in the field of prosthetics beyond their traditional role in fracture management, where they are used to create molds for prosthetic limbs, and in the arts, where they serve as a tool for creating sculptures and casts.

Growing concerns about patient safety and product quality are leading to the implementation of new regulations by organizations such as the Food and Drug Administration (FDA). These regulations mandate that plaster bandages meet specific safety and performance standards. These rules are likely to stimulate market innovation, pushing manufacturers to develop safe, effective plaster bandages.

However, the high cost of healthcare services remains a challenge for the market, as many patients struggle to afford the necessary treatments and dressings. Despite this, advancements in dressing technology, such as the use of biocompatible materials and advanced wound care solutions, are helping to mitigate these challenges and improve patient outcomes. Overall, the market is expected to continue growing in the coming years, driven by these and other market trends.

Surgical Dressing Market Driver

Growing prevalence of chronic diseases is notably driving market growth. The market caters to the demand for advanced wound care solutions for various conditions, including cardiovascular diseases, obesity, non-healing wounds, ulcers, and complications from surgical interventions. According to the

Centers for Disease Control and Prevention (CDC), an estimated 6.5 million individuals aged 40 years and above in the US have cardiovascular diseases, with an equal prevalence among men and women.

Furthermore, factors contributing to this trend include low awareness, especially in developing economies, and lifestyle choices such as smoking, high cardiac rhythm, atherosclerosis, diabetes, and high cholesterol. Wound care biologics, such as foam dressing, alginate dressing, soft silicone dressing, hydrogel dressing, hydrocolloid dressing, and film dressing, are essential in managing primary and secondary dressings for various conditions, including burns, transplant sites, amputations, foot ulcers, and infections. These advanced wound care solutions are increasingly being adopted in hospitals, specialty clinics, and home healthcare settings to ensure effective complications prevention. Thus, such factors are driving the growth of the market during the forecast period.

BUSINESS AND / OR KEY INDUSTRY AND/OR TRADE RELATED LAWS AND REGULATIONS

Drugs and Cosmetics Act, 1940 (“DCA”) and Drugs and Cosmetics Rules, 1945 (“DCR”)

Drugs and Cosmetics Act regulates the import, manufacture, distribution and sale of drugs and cosmetics in India including labelling, packing, and testing as well as matters pertaining to drug formulations and its active ingredients. It prohibits the manufacture and sale of certain drugs and cosmetics which are misbranded, adulterated or spurious. Drugs and Cosmetics Act empowers the Central government to prescribe rules for testing and licensing new drugs. The procedures under the Drugs and Cosmetics Act and the Drugs and Cosmetics Rules provide for obtaining a series of approvals at different stages of testing drugs before the Drugs Controller, India and/or respective state licensing authority which grants the final license to allow the drug to be manufactured and marketed.

The DCA prohibits inter-alia the manufacture and sale of:

- i. drugs and cosmetics which are not of standard quality or are misbranded, adulterated or spurious.
- ii. any patent or proprietary medicine, unless the true formula or list of active ingredients is displayed in the prescribed manner on the label, together with the quantities thereof.
- iii. any drug which by means of any statement, design or device accompanying it or by any other means, purports or claims to prevent, cure or mitigate any such disease or ailment, or to have any such other effect as may be prescribed.
- iv. any cosmetic containing any ingredient which may render it unsafe or harmful for use under the directions indicated or recommended.
- v. It further prohibits inter-alia the exhibition, offer for sale, distribution or sale of any drug or cosmetic which has been imported or manufactured in contravention of any of the provisions of DCA or any rule made there under.

The Drugs and Cosmetics Rules mandate that every person holding a license must keep and maintain such records, registers and other documents as may be prescribed which may be subject to inspection by the relevant authority.

Drugs, Medical Devices and Cosmetics Bill, 2023 (the “Drugs Bill, 2023”)

The Ministry of Health and Family Welfare, Government of India, released the Drugs, Medical Devices and Cosmetics Bill, 2023. The Drugs Bill, 2023 seeks to replace the Drugs and Cosmetics Act, 1940 (the “DCA”) as the law governing the import, manufacture, distribution and sale of drugs, medical devices and cosmetics and ensure their quality, safety, efficacy, performance and clinical trial of new drugs and clinical investigation of investigational medical devices and clinical performance evaluation of new in vitro diagnostic medical device including AYUSH drugs, medical devices and cosmetics with the objective of highest possible regulatory standards and a transparent regulatory regime. The DCA treated medical devices as a subset of “drugs” and the same set of laws governed both types of products. However, due to the increase in sophistication and improvement in technology of medical devices, the need to treat such devices as a distinct category is apparent, and the Drugs Bill, 2023 regulates such devices differently from drugs.

The Drugs Bill, 2023 introduces a more comprehensive definition for medical devices to include all types of equipment and software for diagnosis and disease management, including implants, devices for assistance with disabilities, life support systems, disinfection instruments, reagents, conception control devices, in-vitro kits, apparatus and equipment, etc. The Central Government has proposed to constitute a new “Medical Devices Technical Advisory Board”, which will advise the government on the technical aspects of medical devices and will perform functions analogous to those performed by the Drugs Technical Advisory Board. Officials from the Health Ministry, Department of Atomic Energy, Department of Science and Technology, Ministry of Electronics, Defence Research and Development Organization along with experts in the fields of biomedical, biomaterial and polymer technologies will be a part of this board. Central and State Medical Device Testing Centres are to be set up along the lines of Central and State Drugs Laboratories to test and evaluate medical devices.

Medical Device Rules, 2017 (“MDR”)

The Medical Devices Rules (MDR), 2017 (Amended in 2020), under the Drugs & Cosmetics Act, 1940 notified by the Ministry of Health & Family Welfare (“MoHFW”), regulates the Clinical Investigation, Manufacture, Import, Sale and Distribution of the medical devices in the country. The rules have been drafted with the intention to distinguish medical devices from pharmaceuticals for the purpose of regulation. Only the devices notified by the Government are regulated and falls under the provisions of regulations as per MDR. International forums such as WHO, IMDRF and MDSAP have prescribed global standards for risk-classification, nomenclature, QMS and post-market surveillance, which have been adopted by India as part of the MDR 2017. In tune with the global practice, the 2017 Rules has introduced a risk based classification system for regulation of medical devices including Low risk (Class A) Low Moderate (Class B) Moderate High (Class C) and High-Risk devices classified as (Class D). The manufacturing of low-risk Class A and low-moderate risk Class B are regulated by the State Licensing Authority (“SLA”) while the Central Licensing Authority (“CDSCO”) regulates the moderate high-risk Class C and high-risk Class D medical devices. Further, the CDSCO regulates the import and clinical investigation of all medical devices while the SLA regulates the sale of medical devices. Further, vide Notification No. GSR 102(E) dated 11.02.2020, the registration of these devices has been kept voluntary for a period of 18 months w.e.f. 1st April 2020, post which the registration of Class A & B devices shall be mandatory within 12 months and registration of Class C & D devices shall be mandatory within 24 months, after 18 months of voluntary registration period is over, thereafter, all medical devices will need to be licensed under the Medical Devices Rules, 2017 as amended by Medical Devices (Amendment) Rules, 2020, except 37 categories of medical devices. Subsequent to the request of the Industries, CDSCO has

notified that Licensing of Class A & B Medical Devices will be effective from 01.10.2022 and Licensing of Class C & D Medical Devices will be effective from 01/10/2023. A wide range of regulatory approvals necessitated by the variety of sciences and industry segments related to the medical devices sector creates high compliance and regulatory burden. The transition period in licensing by the CDSCO is an added challenge as manufacturers have to adjust to new processes over a predetermined timeframe.

National Medical Devices Policy, 2023

The medical devices sector in India is an essential and integral constituent of the Indian healthcare sector. It forms an important pillar in the healthcare delivery system along with healthcare providers, pharmaceuticals and healthcare insurance industry, thereby helping achieve the key objectives of the National Health Policy (NHP), 2017. The medical devices constitute a multi-disciplinary sector, with the following broad classification: (a) Electronic equipment (b) Implants; (c) Consumables and Disposables (d) Surgical instruments and (e) In-Vitro Diagnostic Reagents. Further, there are categories of devices across 24+1 (IVD) sub-categories as per the CDSCO.

With the vision to place the medical devices sector on an accelerated growth path with a patient-centric approach to meet the evolving healthcare needs of patients by building an innovative and globally competitive industry in India, the National Medical Policy 2023 has been approved by the Union Cabinet on April 26, 2023. The policy is envisaged to provide the required support and directions to strengthen the medical devices industry into a competitive, self-reliant, resilient and innovative industry that caters to the healthcare needs of not only India but also of the world. The Policy envisions to place the Indian medical devices sector on an accelerated growth path with a patient-centric approach to meet the evolving healthcare needs of patients by building an innovative and globally competitive industry in India, supported by world class infrastructure in alignment with PM Gati Shakti, enabling ecosystem, streamlined regulatory framework and quality manpower. This will ensure access to patient-centric, innovative and affordable healthcare products of excellent quality for better healthcare outcomes. This aim is to emerge as the global leader in the manufacturing and innovation of medical devices by achieving 10-12% share in the expanding global market over the next 25 years.

The Policy mentions six (6) strategies for the promotion of the medical device industry: -

- Regulatory Streamlining
- Enabling Infrastructure
- Facilitating R&D and Innovation
- Attracting investments in the Sector
- Human Resources Development
- Brand Positioning and Awareness Creation

The Policy will facilitate the growth of the medical devices sector that not only serves the needs of the Indian market but that of global market as well. The Policy lays down a roadmap for accelerated growth of the medical devices sector while promoting safety and quality to systematically achieve the following missions:

Access & Universality: To strongly advocate for universal access to good quality Medical Devices for ensuring quality healthcare services to all at all ages, by responding to and aligning with public health strategies.

Affordability: To enhance the domestic manufacturing capacity and capability for newer technologies, so as to make the medical devices affordable and thereby, reducing the out-of-pocket expenditure on diagnostics, thus reducing the lifetime cost of disease burden.

Quality: To ensure the quality of the products manufactured in the country to be given utmost importance and more focus in order to enhance global positioning, acceptability and competitiveness.

Patient Centered & Quality Care: To improve the quality of care by improving clinical outcomes and convenience of the patients, through early diagnosis of diseases and increased accuracy in treatment.

Preventive & Promotive Health: To make people more aware and vigilant, enabling them to lead a healthier lifestyle by achieving extensive application of medical devices in early screening and diagnosis for early detection / prevention and management of diseases.

Security: To ensure the Medical Devices Security (on par with Drug and food security of the country), by development of strong local manufacturing capabilities including for components and ancillary industry and to develop a resilient supply chain for inputs or raw materials, with optimal level of external dependency.

Research and Innovation: To create an eco-system in tune with evolving times and needs to encourage and sustain the innovation in the Sector, such as technology driven medical devices with miniaturization /nanotechnology / telecommunication technologies / IoTs & AI and precision and Individualized care for preventive, promotive, diagnostic, curative, rehabilitative, geriatric and palliative healthcare.

Skilled manpower: To facilitate the future-ready skilled manpower aligned to the multi-disciplinary nature of medical device technologies.

Central Drugs Standard Control Organization

The Central Drugs Standard Control Organization (CDSCO) comes under the Ministry of Health and Family Welfare (MoH&FW) as the national regulating authority for medical devices and pharmaceuticals in India. The CDSCO works to regulate and monitor the health standards of pharmaceuticals and medical devices, specifically their safety, efficacy, and quality levels. The standards to which devices are held are outlined under the Drugs and Cosmetics Act, 1940 Act. The Central Drugs Standard Control Organization (CDSCO) headed by the Drugs Controller General of India (DCGI) is primarily responsible for coordinating the activities of the State Drugs Licensing Authorities (SLAs), formulating policies, and ensuring uniform implementation of the DCA and MDR throughout India.

Production Linked Incentive Scheme for Promoting Domestic Manufacturing of Medical Devices

The Government of India vide Notification No. 31026/08/2020-MD dtd July 21, 2020 has approved a scheme called “Production Linked Incentive Scheme for Promoting Domestic Manufacturing of Medical Devices” with a view to address the disability in manufacturing of medical devices in India vis-à-vis other major manufacturing economies. ENVIRONMENTAL LEGISLATIONS

We are subject to various environmental regulations as the operation of our establishments might have an impact on the environment in which they are situated. The basic purpose of the statutes given below is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (“PCBs”), which are vested with diverse powers to deal with water and air pollution, have been set up in each state and in the Centre. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking inspection to ensure that industries are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure and investigation. All industries are required to obtain consent orders from the PCBs, which are required to be periodically renewed. These consent orders are indicative of the fact that the industry in question is functioning in compliance with the pollution control norms.

The Environmental Protection Act, 1986 is an “umbrella”; legislation designed to provide a framework for coordination of the activities of various Central and State authorities established under various laws. The potential scope of the Act is broad, with “environment” defined to include water, air and land and the interrelationships which exist among water, air and land, and human beings and other living creatures, plants, micro-organisms and property. The EPA vests with the Government of India, the power to take any measure it deems necessary or expedient for protecting and improving the quality of the environment and preventing and controlling environmental pollution. This includes rules for the quality of environment, standards for emission of discharge of environment pollutants from various sources as provided under the Environment (Protection) Rules, 1986, inspection of any premises, plant, equipment, machinery, and examination of manufacturing processes and materials likely to cause pollution.

Further, the Ministry of Environment and Forests looks into Environment Impact Assessment. The Ministry receives proposals for expansion, modernization and setting up of projects and the impact which such projects would have on the environment which is assessed by the Ministry in detail before granting clearances for such proposed projects. Additionally, under the Environmental Impact Assessment Notification, 2006 and its subsequent amendments, projects are required to mandatorily obtain environmental clearance from the concerned authorities depending on the potential impact on human health and resources.

National Environment Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

1. Conservation of Critical Environmental Resources

2. Intra-generational Equity: Livelihood Security for the Poor
3. Inter-generational Equity
4. Integration of Environmental Concerns in Economic and Social Development
5. Efficiency in Environmental Resource Use
6. Environmental Governance
7. Enhancement of resources for Environmental Conservation.

RoDTEP notified by Department of Commerce and administered by Department of Revenue is a new scheme which has been implemented for exports with effect from January 01, 2021, formed to replace the erstwhile MEIS (Merchandise Exports from India Scheme) with issuance of remission amount in the form of transferable duty credit / electronic scrip (e-scrip) which will be maintained in an electronic ledger by the Central Board of Indirect Taxes and Customs (CBIC). The e-scrips would be used only for payment of duty of Customs leviable under the First Schedule to the Customs Tariff Act, 1975 viz., Basic Customs Duty. The scheme will ensure that the exporters receive the refunds on the embedded taxes and duties previously non-recoverable. The scheme was brought about with the intention to boost exports which were relatively poor in volume previously. The scheme rebates various duties/taxes/levies, at the Central, State and local level, borne on the exported product, including prior stage cumulative indirect taxes on goods and services used in the production of the exported product and such indirect duties / taxes / levies in respect of distribution of exported product. This is a measure towards zero-rating of exports. The rebate allowed is subject to the receipt of sale proceeds within time allowed under the Foreign Exchange Management Act, 1999 failing which such rebate shall be deemed never to have been allowed. The rebate under the scheme shall not be available in respect of duties and taxes already exempted or remitted or credited. All the items under the MEIS and the RoSTCL (Rebate of State and Central Taxes and Levies) are now under the purview of the RoDTEP Scheme.

Under this scheme, an exporter of goods is entitled to a refund of the excise duty and integrated goods and services tax paid by him on the inputs used in the products exported by him. It neutralizes the duty impact on the goods exported by giving a relief on customs and central excise duties suffered on the inputs used in the manufacture of export product. The Customs and Central Excise Duties Drawback Rules, 2017, as amended (Drawback Rules) have also been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under, duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme. INTELLECTUAL PROPERTY LEGISLATIONS

Intellectual property in India enjoys protection under both common law and statutes. Under statutes, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957 and trademark protection under the Trade Marks Act, 1999. These enactments provide for the protection of intellectual property by imposing civil and criminal liability for infringement. In addition to the domestic laws, India is party to several international intellectual property related instruments including the Patent Cooperation Treaty, 1970, the Paris Convention for the Protection of Industrial Property, 1883, the Berne Convention for the Protection of Literary and Artistic Works, 1886, the Universal Copyright Convention adopted at Geneva in 1952, the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations, 1961, and as a member of the World Trade Organisation, India also is a signatory to the Agreement on Trade Related aspects of Intellectual Property Rights (“TRIPS”).

Trade Marks Act, 1999 (“Trade Marks Act”)

The Trademarks Act, 1999 provides for the application and registration of trademarks in India for granting exclusive rights to marks such as a brand, label and heading and obtaining relief in case of infringement. The Trademarks Act also governs the statutory protection of trademarks and prohibits any registration of deceptively similar trademarks or chemical compounds, among others. A ‘Mark’ may consist of a word or invented word, signature, device, letter, numeral, brand, heading, label, name written in a particular style, the shape of goods other than those for which a mark is proposed to be used, or any combination thereof or a combination of colours and so forth. Indian law permits the registration of trademarks for both goods and services. It also provides for infringement, falsifying and falsely applying for trademarks. Under the

provisions of the Trademarks Act, an application for trademark registration may be made before the Trademark Registry by any person claiming to be the proprietor of a trade mark, whether individual or joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future. The trademark once it is applied for is advertised in the trademarks journal, oppositions, if any, are invited and after satisfactory adjudication of the same, is given a certificate of registration. Once granted, a trademark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed for similar periods on payment of prescribed renewal fees. If not renewed, the mark lapses and the registration are required to be restored. The right to use a mark can be exercised either by the registered proprietor or a registered user. Further, pursuant to the notification of the Trade Marks (Amendment) Act, 2010 (“Trademark Amendment Act”) simultaneous protection of trademarks in India and other countries has been made available to owners of Indian and foreign trademarks. The Trademark Amendment Act also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to conform Indian trademark law to international practice.

Copyright Act, 1957 and the rules made thereunder

The Copyright Act, 1957, along with the Copyright Rules, 1958, (collectively, “Copyright Laws”) serve to create property rights for certain kinds of intellectual property, generally called works of authorship. The Copyright Laws protect the legal rights of the creator of an ‘original work’ by preventing others from reproducing the work in any other way. The intellectual property protected under the Copyright Laws includes literary works, dramatic works, musical works, artistic works, cinematography, and sound recordings. Various rights including ownership and economic rights are conferred on the author. These include the right to reproduce the work in any form, issue copies to the public, perform it, and offer for sale and hire. The Copyright Laws prescribe fine, imprisonment or both for violations, with enhanced penalty on second or subsequent convictions. While copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration constitutes prima facie evidence of the particulars entered therein and may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Upon registration, the copyright protection for a work exists for a period of 60 years following the demise of the author. Reproduction of a copyrighted work for sale or hire, issuing of copies to the public, performance or exhibition in public, making a translation of the work, making an adaptation of the work and making a cinematograph film of the work without consent of the owner of the copyright are all acts which expressly amount to an infringement of copyright. The penalty for general infringement of copyright is imprisonment of maximum 3 (three) years and a fine of up to ₹ 2,00,000/- (Rupees Two Lakhs Only).

The controller registers a design under this Act after verifying that the design of any person, claiming to be the proprietor, is the new or original design not previously published anywhere in any country and is not against any public policy or morality. Any obvious or fraudulent imitation of a design, which is already registered, without the consent of its proprietor, is unlawful. The amended Patents Act defines “inventive step” to mean a feature of an invention that involves a technical advance as compared to the existing knowledge or having economic significance or both and that makes an invention not obvious to a person skilled in the art. The Information Technology (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009 specifically permit the Government of India to block access of any information generated, transmitted, received, stored or hosted in any computer resource by the public, the reasons for which are required to be recorded by it in writing.

In exercise of this power, the Department of Information Technology, (“DoIT”) Ministry of Electronics and Information Technology, Government of India, in April 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (“IT Security Rules”) which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected, and any third-party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law.

The DoIT also notified the Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 (“IT Intermediary Rules”) requiring intermediaries and publishers receiving, storing, transmitting, or providing any service with respect to electronic messages or any other information to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediary Rules, to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it, as well as specifying the due diligence to be observed by intermediaries. Notes to Restated Financial Statement

p. AS - 22 Accounting for Taxes on Income

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act 1961 that is enacted or substantially enacted on the reporting date. Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each Balance Sheet date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Company writes down the carrying amount of a deferred tax assets to the extent that it is no longer reasonably certain or virtually certain as the case may be that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write down is reversed to the extent that it becomes reasonably certain or virtually certain as the case may be that sufficient future taxable will be available.

q. AS - 26 Intangible Assets

Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortisation and impairment.

r AS - 28 Impairment of Assets

The carrying amounts of assets are reviewed at each Balance Sheet date to determine if there is any indication of impairment based on internal / external factors. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. No such impairment process for tangible assets is carried out by the Company during the current year.

s AS - 29 Provisions and contingencies

A provision is recognized when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

t Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand and short-term bank deposits having maturity period of three months or less from the date of acquisition, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Restated Profit before Exceptional Items, Extraordinary Item & Tax:- Restated Profit before Exceptional Items, Extraordinary Item & Tax for the financial year 2022-23 amounted to ₹ 104.41 Lakhs, whereas the profit for financial year 2021-2022 were ₹ 144.35 lakhs which represents a decrease 27.67%

from the preceding financial year 2021-22 . It has been analyzed that profit before exceptional items, extraordinary items & tax to total Income constitute 3.26% in financial year 2022-23 in comparison to 4.70% in financial year 2021-22.

Profit after Tax: -The Company had reported net profit after tax of Rs 157.14 lakhs in financial year 2022-23, which marks a substantial increase when compared to the preceding financial year, 2021-22, where the PAT was Rs (21.32). There is an increase in PAT by 836.94% which is mainly due to decrease in provision for diminution in value of assets in FY 2023. When analyzing the proportion of Restated Profit After Tax (PAT) with the total income, it is observed that in the financial year 2022-23, PAT represented 4.80% of the total income. Whereas in financial year 2021-22, PAT contributes (0.70%) of total income. The main reason for substantial change in Profit after tax is shown in table as under:

Particular	March 31,2023	March 31,2022
Provision for diminution in value of Assets	-95.88	136.97

The company has a strategic investment in a listed group company, classified as a long-term investment. As per the accounting policy followed by the company, this investment is valued at cost unless there is a permanent decline in its value. A provision of Rs. 136.97 lakh was made in FY 2021-22 due to a significant drop in the share price as of March 31, 2022. In FY 2022-23, the share price saw a notable recovery, and based on this positive trend, the provision for impairment was reduced to Rs. 41.09 lakh which resulted in reversal of provision by Rs. 95.88 lakhs in FY2023.

Although the company's profit before exceptional items, extraordinary items, and tax declined from Rs. 144.35 lakhs in FY2022 to Rs. 104.41 lakhs in FY2023, the reversal of provision led to an increase in PAT, rising from Rs. (21.32) lakhs in FY2022 to Rs. 157.14 lakhs in FY2023.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on Foreign Direct Investments (**FDI**) through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“**DPIIT**”), issued the Consolidated FDI Policy Circular of 2020 (“**Consolidated FDI Policy**”), which, with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT, which were in force and effect prior to October 15, 2020. The Consolidated FDI Policy will be valid and remain in force until superseded in totality or in part thereof and shall be subject to FEMA Non-Debt Instruments Rules. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

As per the Consolidated FDI Policy, FDI in companies engaged in the Healthcare Sector, which is the sector in which our Company operates, is permitted up to 100% of the paid-up share capital of such company under the automatic route. However, investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident

shareholding is within the sectoral limits under the Consolidated FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, please see chapter titled “**Offer Procedure – Bid by Eligible NRIs**” and “**Offer Procedure – Bid by Eligible FPIs including FIIs**” on Page Nos 489 and 490, respectively of the Draft Red Herring Prospectus.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For further details, see chapter “**Offer Procedure – Who can Bid?**” beginning on Page No. 482 of the Draft Red Herring Prospectus.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, notified the FEMA NDI Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of, and in accordance with the FEMA NDI Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment,

subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (Restricted Investors), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Nondebt Instruments) (Fourth Amendment) Rules, 2020 which came into effect on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

In terms of the FEMA NDI Rules and Consolidated FDI Policy, a person resident outside India may make investments into India, subject to certain terms and conditions. For further details, see chapter titled ***“Offer Procedure”*** beginning on Page No. 474 of the Draft Red Herring Prospectus. Each Bidder should seek independent legal advice about its ability to participate in the Bid/Offer.
